

Gonzagarredi Soc. Coop. policy aims at the following strategic targets:

- Products and services supplied shall meet the requirements specified in relevant contracts, provisions in force, accepted commercial uses, technical applicable rules.
- Customer's requirements shall be met.
- The Company shall operate within the framework of a "sustainable development".

In order to achieve the above targets **Gonzagarredi Soc. Coop.** has set the following guidelines and made them available to the "Parties concerned" inside and outside the Company:

- The Environmental Control System shall be maintained as a control instrument for the reduction of the environmental impact of processes, products and services as for: external noise, emissions into the atmosphere, discharge to ground and into water, fire, consumption of materials, use of energy sources, production and disposal of waste.
- Specific environmental targets shall be set for each level and function; the Environmental Control System shall be divulged and implemented at all levels and for all functions in the Company.
- The Environmental Control System shall be steady improved and integrated with the Quality Assurance System.
- Common targets for the reduction of the environmental impact of all activities, products and services shall be set, implemented and developed together with our suppliers, customers and other parties concerned.
- All activities in the Company causing, directly or indirectly, environmental impact as well as consumption of energy and materials shall be prevented and progressively reduced.
- Any laws and regulations regarding environmental aspects which directly concern our activities (both in course and under development) shall be complied with.

The Environmental Control System, set up in compliance with the standard UNI EN ISO 14001:2004 and with our environmental policy, is described in the "Manual for the Environmental Control System" and in the related procedures. It confirms **Gonzagarredi Soc. Coop.** commitment for a continuous improvement of the environmental implications of its activities, products and services.
